

Multilayer PEX Pipe for Plumbing

This multilayer PEX pipe is designed for plumbing applications. It is WRAS approved for potable water systems and consists of multiple layers for enhanced pressure resistance, thermal stability, and flexibility.

Product Overview

Professional Multilayer Plumbing Solutions

These multilayer pipes are engineered for superior performance in both residential and commercial potable water and radiant heating systems. By sandwiching an aluminum core between layers of cross-linked polyethylene, the pipe gains exceptional pressure resistance, thermal stability, and shape retention. The integrated oxygen barrier prevents corrosion within hydronic systems, ensuring a long-lasting and reliable plumbing infrastructure.

Technical Specifications

Welding Technology

- Ultrasonic overlapping weld
- Laser butt-weld

Available Constructions

PEX-AL-PEX, PE-AL-PE, PERT-AL-PERT

Certifications & Compliance

Quality Standards

WRAS Approved
