

Multimedia Speaker System with Subwoofer

This multimedia speaker system is designed for computer peripherals. It includes a subwoofer and two satellite speakers to provide a balanced audio experience.

Overview

High-Performance Multimedia Audio

This multimedia speaker system features a powerful subwoofer combined with two satellite speakers to deliver a balanced and immersive audio experience. Designed specifically for home computer setups, it offers precise control over total volume and bass output. The system is engineered to provide clear, high-fidelity sound with low distortion for a professional desktop audio solution.

Performance Metrics

Total Power

| | |
|-----------------------------|-----------------------------|
| 16 W Actual Power | 95 dB Noise Floor |
|-----------------------------|-----------------------------|

Signal Integrity

- Total Harmonic Distortion: 0.005%-0.01%
- Input Impedance: 10KOhm

Hardware Specifications

Driver Configuration

| Component | Size | Power |
|-------------------|--------|---------|
| Subwoofer | 4 inch | 10W |
| Satellite Speaker | 3 inch | 3W (x2) |

Physical Dimensions (W x H x D)

- Subwoofer: 133 x 195 x 345 mm
- Satellite Box: 93 x 130 x 84 mm
