

Multipurpose Workstation Platform

This workstation platform is designed to enhance efficiency and precision in various woodworking and metalworking tasks. Its robust steel frame features adjustable support arms, providing a stable base for cutting, drilling, and clamping operations.

Overview

Professional Workstation Platform

This versatile multipurpose workstation provides a stable and adjustable base for precision woodworking and metalworking tasks. Featuring a robust design with extensive material support options, it is engineered to enhance efficiency in professional environments. The modular architecture allows for seamless integration into various workflows, ensuring both stability and convenience during operations.

Dimensions

Bed Length	1560 mm
Attachment Arm Length	500 mm
Slot Adjustment from Back	480 mm
Total Width Between Support Rollers	2800 mm
Floor to Adjustment Arms Height	820 mm
