Overview

Specializing in production of buttons and indicators since 1997

Durable metal construction designed for industrial safety circuits.

Industrial Emergency Stop Switch

This metal mushroom head emergency stop switch is designed for critical safety applications in industrial environments. Featuring a robust push-pull operation, it ensures immediate and reliable circuit interruption in emergency situations. The unit is constructed with high-grade zinc alloy and anti-flame plastic, offering durability and high resistance to electrical erosion for long-term performance.

Technical Specifications

Mechanical Life

1000000 cycles
Pushbutton

500000 cycles
Selector Switch

Electrical Life

5000000 cycles
Pushbutton

250000 cycles
Selector Switch

Rated Insulation Voltage	600 V
Conventional Heating Current	10 A
Insulation Resistance	e5M©
Contact Resistance	d25h©
Power Frequency Withstand Voltage	AC 2.5KV/min

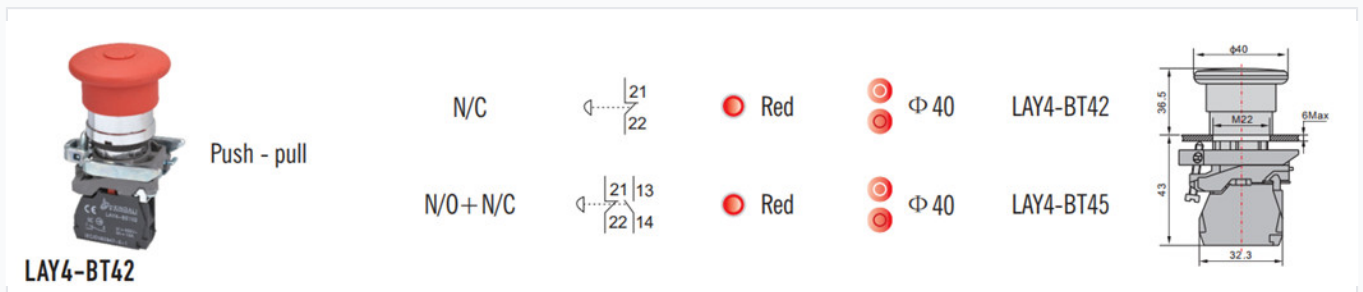

Compliance & Standards

Standards Compliance

- GB/T14048.1
- IEC60947-5-1

Certifications	CE, ISO9001, ROHS, UL
----------------	-----------------------

Mechanical Design

Construction Materials

- Zinc Alloy
- High-grade Anti-flame Plastic
- Silver Alloy Contacts

Mounting Hole Diameter	22mm
Mushroom Head Diameter	40 mm
Operation Mechanism	Push-Pull
