

Mushroom Head Emergency Stop Push Button Switch

This emergency stop push button switch features a red mushroom-shaped actuator. It is designed for quick and reliable emergency stops in industrial applications.

Overview

Specializing in production of buttons and indicators since 1997

The mushroom-head design ensures high visibility and ease of operation during emergencies.

Industrial Emergency Stop Solution

The LAY5-BC42 is a high-performance emergency stop push button switch engineered for critical industrial control applications. Featuring a prominent red mushroom-head design, it ensures immediate and reliable circuit interruption in emergency situations. The unit is constructed with durable materials, including zinc alloy and high-grade anti-flam plastic, and utilizes silver alloy contacts for superior anti-electrical erosion properties, ensuring long-term reliability in demanding environments.

Technical Parameters

Electrical Ratings

660 V

Max AC Voltage

400 V

Max DC Voltage

10 A

Heating Current

Performance Specifications

Parameter	Value
Insulation Resistance	e5M©
Contact Resistance	d2m©
Withstand Voltage	AC 2.5KV/min
Voltage Wave	±20%
Brightness	60cd/m2

Durability

Service Life

- Mechanical Life (Pushbutton): 1,000,000 cycles
- Mechanical Life (Selector Switch): 500,000 cycles
- Electrical Life (Pushbutton): 5,000,000 cycles
- Electrical Life (Selector Switch): 250,000 cycles
- Continuous Working Life: 100,000 hours

Certifications

Compliance & Standards

CE, ISO 9001, RoHS, UL, GB/T14048.1, IEC60947-5-1

Design

Construction Materials

Zinc Alloy Body • High-grade Anti-flam Plastic • Silver Alloy Contacts
