Product Overview

Industrial Mushroom Head Push Button

This industrial push button switch features a distinctive red mushroom-shaped actuator designed for high visibility and reliable emergency or standard control operations. The modular design includes independent NO and NC contact groups, allowing for versatile configuration to meet specific application requirements. Engineered for stability in low-voltage and low-current environments, this switch is built to handle the rigors of heavy-duty industrial control panels.

Technical Specifications

| | |
|--|--------------|
| Rated Voltage | 660 V |
| Rated Thermal Current (I _{th}) | 10 A |
| Utilization Category | AC-15, DC-13 |
| Lamp Holder Type | Ba9s |
