

N95 Mask Sealing Machine

This machine is designed for the efficient sealing of N95 masks. The automated system enhances productivity by processing multiple masks simultaneously with its six-head configuration and includes an edge bonding mechanism for a secure and reliable seal.

Product Overview

N95 Mask Sealing Machine

This specialized N95 sealing machine is designed to streamline mask production with high efficiency. Featuring a six-head configuration, it allows for the simultaneous processing of multiple masks, significantly enhancing output. The system integrates a precise edge bonding mechanism to ensure secure and reliable seals, making it an ideal solution for manufacturers looking to optimize their production lines.

Performance Metrics

Production Rate

25 pcs/min
Minimum Output

30 pcs/min
Maximum Output

Technical Specifications

Head Configuration	6 heads
Operational Features	Edge Bonding, Manual Loading, Automatic Removal
