Product Overview

High-Efficiency Packaging Solution

This fully automatic soft packing machine is designed for the efficient packaging of napkin paper and facial tissues using nylon film. By integrating advanced PLC and inverter control systems inspired by international technology, it ensures high-speed, consistent, and hygienic results. Its user-friendly operation makes it an ideal choice for both beginners and established tissue producers looking to reduce labor costs and streamline production.

Technical Specifications

Packing Speed

30 packs/min

Min Speed

80 packs/min

Max Speed

Power Requirements 220V/380V, 50/60Hz, 3 Phases

Air Pressure 0.7 MPa

Approximate Weight 1500 kg

Features & Capabilities

Key Features

- Fully automatic feeding, wrapping, sealing, and cutting
- PLC and inverter control system
- Compact design with transparent safety enclosures
- Stainless steel and aluminum frame construction
- Emergency stop buttons and safety guards included

Ideal For

Facial Tissue • Napkin Paper • Soft Packing • Medium-scale Production • Large-scale Production
