

Natural Gas Power Generator

This natural gas power generator is engineered for dependable power generation. Its compact design facilitates easy mobility and storage.

Overview

Reliable Natural Gas Power Generation

This natural gas generator is engineered for dependable power generation across diverse applications, from backup power solutions to construction sites and outdoor events. Featuring a robust frame and a high-performance engine, it combines durability with user-friendly operation. The unit is equipped with essential safety features, including overload protection and low oil shutdown, ensuring consistent performance and peace of mind.

Technical Specifications

Model Identifier	CC2000-LPG
Safety Features	Overload Protection, Low Oil Shutdown

Design and Usability

Design Highlights

- Robust frame construction
- Compact design for easy transportation
- User-friendly control panel
- Integrated engine switch

Control Panel Components

- AC outlets
- Circuit breakers
- Engine switch
