

Needle-Nose Pliers

Needle-nose pliers are used for bending, re-positioning, and cutting wire. The long shape of the head allows access into small, congested spaces.

Product Overview

Precision Needle-Nose Pliers

These needle-nose pliers, also known as long-nose or pointy-nose pliers, are essential tools for artisans, jewelers, and network engineers. Designed with a distinctively long head, they allow for precise bending, re-positioning, and cutting of wire in congested areas. Their versatile design makes them a staple for delicate manual tasks requiring access to small, restricted spaces.

Technical Specifications

Ideal For

Jewelers • Network Engineers • Artisans

Model Number

LNP-150

Primary Functions

Bending, Re-positioning, Cutting
