

# NEMA 1-15P Unpolarized Power Cord

This is a standard North American NEMA 1-15P power cord, designed for low-power electronic devices. It features a two-prong plug without a grounding pin and is typically rated for 125V AC.

## Product Overview

### NEMA 1-15P Unpolarized Power Cord

This standard North American power cord features a NEMA 1-15P unpolarized plug, designed for reliable connectivity in low-power electronic applications. The two-prong design is optimized for indoor use and provides a secure, molded connection. Constructed with durable, flexible materials, this cord ensures ease of handling and long-term performance for standard wall outlet connections.

## Technical Specifications

### Plug Configuration

Unpolarized • Two-prong

Voltage Rating	125 V AC
Plug Type	NEMA 1-15P
Grounding	No

## Physical Characteristics

### Design Features

- Molded plug body
- Textured grip for easy insertion/removal
- Indoor use rated

Material	PVC/Flexible Plastic
Color	Black
