

NEMA D Electric Motor for Oil Pumps

High-efficiency NEMA D electric motor designed for oil pump applications. It features robust construction for demanding industrial environments, providing reliable and consistent performance.

Product Overview

Industrial High-Torque Performance

This NEMA D electric motor is specifically engineered to meet the demanding requirements of oil pump applications. Its robust construction ensures reliability and consistent performance in challenging industrial environments. Designed to provide high starting torque and superior overload capacity, it is the ideal choice for heavy-duty oil pumping systems.

Technical Specifications

Compliance Standards

NEMA Standard

Primary Applications

Oil Pumping Systems, Industrial Pumping, High Torque Requirements

Key Features

Operational Capabilities

1 High

Starting Torque Level

1 High

Overload Capacity

Maintenance & Compatibility

- Standardized NEMA dimensions for easy interchangeability
- Rugged design for minimal downtime
- Simplified maintenance protocols
