

NEMA Inch Size Stainless Steel Worm Gearbox

This NEMA inch size stainless steel worm gearbox is lightweight and rust-resistant. It is designed for smooth operation and can work for extended periods in demanding conditions.

Product Overview

High-precision worm gearbox designed for durability in harsh industrial environments.

NEMA Inch Size Stainless Steel Worm Gearbox

These high-precision worm gearboxes are engineered for demanding industrial environments, featuring a robust stainless steel construction that ensures exceptional corrosion resistance and durability. Designed to meet standard NEMA inch size dimensions, they provide reliable power transmission with minimal backlash and high efficiency. Their compact, lightweight design and versatile compatibility make them an ideal solution for applications in food processing, pharmaceutical, and marine industries.

Key Features

Advantages

- High efficiency
- High reliability
- Low maintenance cost
- Low noise

Updated configuration

- Motor is free from oil leakage
- Total efficiency is 95% higher
- More efficient and lower noise
- Higher torque

Multiple motor types

- AC motor: 1 phase or 3 phase
- DC brush motor
- DC brushless motor
- Stepper motor
- Servo motor

Material design

- New design for 100% efficiency
- More efficient and lower noise
- Higher or lower torque
- Maintenance-free assembly

Overview of compatibility with various motor types and key performance advantages.

Advantages

- High efficiency with low noise operation
- Corrosion-resistant stainless steel construction
- Lightweight and compact design
- Smooth running for long-term reliability in harsh conditions
- Updated configuration for improved performance and cooling

Compatibility

Compatible Motor Types

AC Motor (1-phase), AC Motor (3-phase), DC Brush Motor, DC Brushless Motor, Stepper Motor, Servo Motor
