

NEMA Three-Phase Electric Induction Motor

NEMA series energy-efficient motors are designed for industrial applications requiring reliable three-phase power. These induction motors adhere to NEMA standards, ensuring interchangeability and performance characteristics.

Product Overview

Industrial Performance and Efficiency

This NEMA series three-phase electric induction motor is engineered for demanding industrial applications requiring reliable, high-performance power. Designed for energy efficiency, it offers optimized electrical characteristics to reduce operational costs and ensure a long service life. Its robust construction makes it an ideal solution for powering pumps, fans, compressors, and various general-purpose machinery.

Certifications & Standards

| | |
|-----------------|-----------------|
| Compliance | CE, CCC, UL, SA |
| Design Standard | NEMA |

Technical Specifications

Typical Applications

- Pumps
- Fans
- Compressors
- General-purpose industrial machinery
