

# Neon Lighting Transformer Power Supply

This neon lighting transformer provides the necessary power to operate neon lights. It is designed for an input of 220V at 50/60Hz, supporting neon tubes within a 2 to 6 meter range.

## ADDITIONAL IMAGES

## Overview

### Professional Neon Power Solution

This high-performance neon transformer power supply is engineered to provide reliable voltage conversion for professional neon lighting installations. Featuring a compact, enclosed design with integrated ribbed housing, it ensures efficient heat dissipation for stable, long-term operation. It is an ideal choice for powering neon tubes in various commercial and creative lighting applications.

## Technical Specifications

Input Voltage	220 V
Frequency	50/60Hz
Max Power Rating	60 W
Load Range	2 to 6 meters (AE1.2 neon tubes)

## Physical Dimensions

### Unit Dimensions

<b>153 mm</b> Length	<b>58 mm</b> Width	<b>43 mm</b> Height
-------------------------	-----------------------	------------------------

### Wiring Specifications

Connection	Length	Diameter
Input Wire	300mm	2.4mm
Output Wire	200mm	4mm

## Features

Design Features	Compact Design, Enclosed Housing, Ribbed Heat Dissipation, Easy Connection
