

Neoprene Coated Safety Gloves

These industrial gloves feature a neoprene coating for enhanced protection and grip. They are suitable for chemical handling, maintenance, and other tasks requiring hand protection.

Product Overview

Industrial-Grade Neoprene Protection

These neoprene-coated safety gloves are engineered for superior hand protection in demanding industrial environments. Designed for chemical handling and general maintenance, they offer enhanced grip and durability. Buyers can choose between cotton or jersey liners for comfort, as well as various cuff styles and finish textures to match specific application needs.
