

Network Data Transmission Hub

This network hub facilitates data transmission and network connectivity. It is equipped with multiple ports for connecting various devices and features LED indicators to monitor the status.

Overview

Industrial Network Data Transmission Hub

This network data transmission hub is engineered for reliable connectivity in industrial and embedded environments. It features multiple ports for device integration and clear LED status indicators for real-time monitoring. Designed for robust performance, the unit includes dedicated terminal blocks for secure power and data transmission.

Technical Specifications

Network Compatibility

LON Network

Interface Connections

- TXD (Transmit Data)
- RXD (Receive Data)
- GND (Ground)
- A
- B

Model Number

HW-BA5260

Status Indicators

Power, ACTV, TXD, RXD

Device Type

Router / Network Hub
