

Network Switch

This network switch facilitates connectivity between network devices. It is designed for rack mounting and features status indicator LEDs and a display screen.

Product Overview

Professional Network Switch

This high-performance network switch is engineered for demanding data center and server room environments. It features 12 dedicated ports supporting 1000BASE-LX connectivity, ensuring reliable high-speed data transmission for professional networking tasks. The unit is designed for efficient rack mounting and includes a clear display screen for real-time monitoring of network activity.
