

Neutral Gray Plastic Pellets

High-quality plastic pellets ideal for injection molding and extrusion processes. These neutral gray, cylindrical pellets ensure consistent material properties for durable plastic products.

Product Overview

High-Quality Neutral Gray Pellets

These neutral gray plastic pellets are engineered for consistent performance in injection molding and extrusion manufacturing processes. Featuring a cylindrical shape with uniform composition, they provide the reliability needed for creating durable plastic components. This material is an excellent choice for manufacturers seeking a versatile base for a wide variety of industrial and consumer plastic applications.

Physical Properties

Color	Neutral Gray
Form Factor	Cylindrical with rounded edges

Application & Usage

Key Benefits

- Uniform material composition
- High durability
- Consistent processing properties

Compatible Processes	Injection Molding, Extrusion
