

NH1 Ceramic Thermal Fuse Link

NH(H.R.C) fuses have a breaking capacity of 120kA. Rated voltages are 500V AC, rated current is up to 630A.

 **Dixsen**

NH1

Product Overview

High-Performance Thermal Protection

This NH1 ceramic thermal fuse link is engineered for robust electrical protection in demanding industrial environments. With a high breaking capacity of 120kA, it ensures immediate circuit interruption during short-circuit events to safeguard critical equipment. Designed for general-purpose applications, this fuse link adheres to international safety standards, providing reliable performance in electrical installations operating up to 500V AC.

Technical Specifications

Rated Current

630 A

Max Rated Current

250 A

Sample Rated Current

Rated Voltage	500 V
Breaking Capacity	120 kA
Size	NH1

Compliance & Standards

Application Class

gL/gG • General Purpose

Standards Compliance	IEC 60269, EN 60269, VDE 0636/21
