

# Ni-MH AAA Rechargeable Battery 1.2V 1000mAh

This is an environmentally friendly rechargeable battery. It is designed for various electronic devices and features a long lifespan and consistent power output.

## Product Overview

### High-Performance Rechargeable Power

These Ni-MH AAA rechargeable batteries are designed as an environmentally friendly power solution for a wide range of electronic devices. With a capacity of 1000mAh and a consistent 1.2V output, they offer a reliable and long-lasting energy source. They are an ideal choice for everyday electronics such as cameras, remote controls, and other small portable devices, helping to reduce waste through reusability.

## Technical Specifications

### Key Performance Metrics

<b>1.2 V</b> Voltage	<b>1000 mAh</b> Capacity
-------------------------	-----------------------------

<b>Battery Chemistry</b>	Nickel-Metal Hydride (Ni-MH)
<b>Size Format</b>	AAA

## Features

### Eco-Friendly Status

Rechargeable • Environmentally Friendly

<b>Ideal Applications</b>	Cameras, Remote Controls, Small Electronics
