

Ni-MH Rechargeable AA Batteries 1.2V 2600mAh

High-capacity Ni-MH rechargeable AA batteries are designed for optimal performance in various electronic devices. With a voltage of 1.2V and a capacity of 2600mAh, these batteries provide long-lasting power and extended usage.

Product Overview

High-Capacity Rechargeable Power

These Ni-MH rechargeable AA batteries are engineered for optimal performance in a wide range of electronic devices. With a robust 2600mAh capacity and 1.2V output, they provide reliable, long-lasting power suitable for high-drain equipment. Designed to be recharged multiple times, these batteries offer an environmentally friendly and cost-effective alternative to single-use power sources.

Technical Specifications

Battery Chemistry	Nickel-Metal Hydride (Ni-MH)
Nominal Voltage	1.2 V
Capacity	2600 mAh
Battery Size	AA

Key Features

Performance Highlights

2600 mAh

Capacity

1.2 V

Voltage

Key Benefits

- Rechargeable for multiple cycles
- Reduces waste compared to disposable batteries
- Cost-effective long-term solution
- Environmentally friendly design

Recommended Uses

Digital Cameras, Remote Controls, High-Drain Devices
