

Ni-MH Rechargeable Battery 3.6V 120mAh

This rechargeable Ni-MH battery pack is designed for cordless phones and other electronic devices. With a voltage of 3.6V and a capacity of 120mAh, it delivers reliable power and long-lasting performance.

Overview

Reliable Power Solution

This 3.6V Ni-MH rechargeable battery pack is engineered for consistent performance in cordless phones and various small electronic devices. With a capacity of 120mAh, it provides a stable power supply suitable for replacement or upgrade needs. Designed for durability and efficiency, this battery is a dependable choice for maintaining device functionality.
