Product Overview

Reliable Ni-MH Power Solutions

These Nickel-Metal Hydride (Ni-MH) rechargeable battery packs are designed for reliable performance in various electronic applications. Available in different configurations, these packs offer consistent power delivery with capacities ranging from 600mAh to 700mAh. Their compact design and integrated connectors ensure seamless integration into your devices.

Technical Specifications

Available Configurations

Voltage	Capacity
3.6V	700mAh
2.4V	600mAh

Chemistry	Nickel-Metal Hydride (Ni-MH)
-----------	------------------------------

Cell Size	AAA
-----------	-----

Connectivity

Integration Features

- Easy integration into electronic devices
- Pre-wired configuration

Connector Types	2-wire connection, 2-pin connector
