

Ni-MH Rechargeable Battery

High-capacity Nickel-Metal Hydride (Ni-MH) rechargeable batteries are available in various sizes and configurations. These 1.2V batteries are designed for a wide range of applications and feature a robust construction suitable for powering electronic devices.

Product Overview

High-Capacity Ni-MH Rechargeable Solutions

These Nickel-Metal Hydride (Ni-MH) rechargeable batteries are engineered for reliable, long-lasting power across a diverse range of electronic applications. Featuring a consistent 1.2V output, they are available in various form factors including cylindrical and rectangular prismatic cells. Their robust construction ensures durability and compatibility for demanding B2B device integration.

Technical Specifications

Capacity

3000 mAh

Capacity

Nominal Voltage	1.2 V
Chemistry	Nickel-Metal Hydride (Ni-MH)
Available Form Factors	Cylindrical, Rectangular Prismatic
