

NiMH Rechargeable Battery Pack, 800mAh

This is a NiMH rechargeable battery pack. It has a capacity of 800mAh and is designed for indoor use.

Overview

Performance and Reliability

This 800mAh Nickel-Metal Hydride (NiMH) rechargeable battery pack is specifically engineered for vacuum cleaner applications. It provides a reliable power source with a nominal voltage of 9.6V, ensuring consistent performance for your devices. Designed for indoor use, this battery pack is certified to meet international safety standards, making it a dependable choice for your power requirements.

Technical Specifications

Capacity	800 mAh
Nominal Voltage	9.6 V
Battery Chemistry	NiMH (Nickel-Metal Hydride)
Intended Application	Vacuum Cleaners

Safety & Compliance

Certifications	UL, CB, UN38.3, MSDS
----------------	----------------------

Usage Guidelines

Usage Instructions

- Fully discharge and recharge for the first three uses
- Use only the original manufacturer's transformer charger
- Remove battery from device if not in use for extended periods
- Turn off power switch when device is not in use
- Avoid use in humid environments
- Keep away from fire sources
- Do not tear the outer heat shrink film

Operating Temperature	10-40°C
