

# Nitrile and Polyurethane Coated Work Gloves

These gloves feature a nitrile or polyurethane (PU) coating on the palm and fingers for enhanced grip and abrasion resistance. The uncoated back allows for breathability and comfort during extended use.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Hand Protection

These nitrile and polyurethane (PU) coated work gloves are engineered for precision tasks and general handling. Featuring a specialized coating on the palm and fingers, they offer superior grip and abrasion resistance while maintaining excellent tactile sensitivity. The uncoated back design ensures breathability and comfort, making them an ideal choice for assembly, inspection, maintenance, and light-duty tasks.

## Technical Specifications

### Recommended Applications

- Assembly
- Inspection
- Maintenance
- Gardening
- Cleaning

### Key Features

Abrasion Resistant • Breathable Back • High Dexterity • Enhanced Grip

### Coating Materials

Nitrile, Polyurethane (PU)

## Design and Aesthetics

### Available Patterns

- Floral
- Geometric
- Botanical
