

# Nitrile Coated Work Gloves

These nitrile-coated gloves provide excellent hand protection and a secure grip for various industrial applications. The gloves feature a nitrile coating on a fabric liner, offering resistance to chemicals, punctures, and abrasions.

## Product Overview

### Professional Nitrile Coated Work Gloves

These high-performance nitrile dipped gloves are engineered to provide superior protection and grip across a wide range of industrial environments. Featuring a durable nitrile coating on a comfortable fabric liner, they offer excellent resistance against chemicals, punctures, and abrasions. Designed to enhance dexterity and safety, these gloves are an essential choice for professionals in manufacturing, automotive, and construction sectors.

## Technical Specifications

### Available Model Numbers

- N502
- N301-G
