

NiZn Battery Charger with Independent Slots

This charger is designed for NiZn rechargeable batteries. It features four independent charging slots, each with individual LED indicators, and is suitable for home or travel.

Overview

Intelligent Battery Charging Solution

This versatile battery charger is designed to handle 1 to 4 rechargeable AA or AAA batteries simultaneously. Featuring independent charging slots, it ensures each battery is managed individually for optimal safety and performance. Compatible with NiMH and NiCD chemistries, this unit is built for both home and travel convenience with a universal voltage input range.

Technical Specifications

Input Voltage	AC 110-240V
Input Frequency	50-60Hz
Output Voltage	1.2 V
Output Current	500 mA

Features

Safety Assurances

Intelligent Charging • Smart Safety

Compatible Chemistries	NiMH, NiCD
Supported Sizes	AA, AAA
Independent Slots	4
