

NNPB Glass Container Mould Set

Precision-engineered NNPB (Narrow Neck Press and Blow) mould components designed for high-performance glass container manufacturing. The set includes plungers, neck rings, mould halves, and bottom plates, each meticulously machined to exacting tolerances.

Product Overview

Precision NNPB Moulding Solutions

This NNPB (Narrow Neck Press and Blow) mould set is engineered for high-performance glass container manufacturing. Crafted from durable, high-grade materials, these components ensure consistent bottle formation and dimensional accuracy across automated production lines. The specialized design optimizes glass distribution and thermal management, facilitating the production of high-quality, lightweight glass containers while reducing operational downtime.

Technical Specifications

Mould Technology

NNPB • Narrow Neck Press and Blow

Included Components

- Plungers
- Neck rings
- Mould halves
- Bottom plates
