Product Overview

Heavy-Duty No-Hub Pipe Coupling

This heavy-duty no-hub coupling is engineered for secure and reliable pipe connections in plumbing, automotive, and industrial environments. Featuring a durable stainless steel shield combined with a flexible elastomeric gasket, it ensures a tight, leak-proof seal. The integrated worm-drive clamp mechanism allows for adjustable fastening, making it a versatile solution for joining pipes of varying materials and sizes in demanding applications.

Technical Specifications

Key Features

- Leak-proof seal design
- Corrosion resistant
- Adjustable diameter
- Heavy-duty construction

Materials	Stainless Steel, Elastomeric Gasket
Fastening Type	Worm-drive clamp

Applications

Primary Applications

Plumbing • Automotive • Industrial
