

Noise-Cancelling On-Ear Headphones with Bluetooth

These headphones provide a premium listening experience with active noise cancellation technology. Their on-ear design includes cushioned earcups and an adjustable headband for comfortable, extended wear.

Overview

Premium Audio Experience

The K480NC headphones are engineered for professional and personal use, featuring advanced active noise cancellation technology to minimize ambient distractions. Designed with comfort in mind, they include cushioned earcups and an adjustable headband suitable for extended listening sessions. With versatile connectivity options, including seamless Bluetooth pairing and a wired backup, these headphones deliver high-fidelity sound with enhanced bass response.
