Product Overview

Professional Noise Reduction Ear Muffs

These professional-grade ear muffs are engineered to provide reliable hearing protection in demanding, high-noise environments such as construction sites, factories, and workshops. Featuring a versatile design, they offer three distinct wearing positions and an adjustable headband to ensure a secure, universal fit for all users. Constructed with durable materials including ABS and foam inserts, they deliver effective noise attenuation while maintaining long-term comfort.

Technical Specifications

Maximum Attenuation	39.4 dB
