

Non-Contact Infrared Thermometer

This infrared thermometer measures surface temperatures without contact. It has laser sighting for precise targeting and adjustable emissivity settings.

Product Overview

Professional Non-Contact Temperature Measurement

This non-contact infrared thermometer is designed for precise surface temperature measurement from a distance. Featuring laser sighting for accurate targeting and adjustable emissivity, it ensures reliable readings across a variety of surfaces. Its rugged construction and ergonomic design make it a dependable tool for industrial and commercial maintenance, including HVAC, electrical, and automotive applications.

Key Features

Measurement Capabilities

- Non-contact surface temperature measurement
- Laser sighting for precise targeting
- Adjustable emissivity settings
- Backlit display for low-light visibility

Ideal Applications

HVAC, Electrical Maintenance, Automotive Diagnostics, Food Safety

Design & Durability

Construction

Rugged Design • Ergonomic Handle
