

Non-Contact Infrared Thermometer

This infrared thermometer is designed for non-contact temperature measurement, ensuring user safety and convenience. It accurately measures surface temperatures from a distance, with a temperature range of -50°C to 400°C (-58°F to 752°F).

Overview

Professional Non-Contact Infrared Thermometer

This high-performance infrared thermometer is engineered for precise, non-contact temperature measurement across a wide range of industrial and commercial applications. Featuring an ergonomic design with an easy-to-use trigger mechanism, it allows users to safely capture surface temperatures from a distance. Ideal for HVAC, automotive, and general industrial maintenance, this tool provides quick, reliable digital readings for efficient diagnostics.

Performance

Temperature Range

-50 °C

Minimum Temperature

400 °C

Maximum Temperature

Temperature Range (Fahrenheit)

-58°F to 752°F

Design & Build

Design Features

Non-Contact, Ergonomic Grip, Trigger Activation, Digital Display

Housing Color

Yellow and Black

Applications

Suitable Applications

- HVAC Systems
- Automotive Diagnostics
- Industrial Maintenance
- General Surface Temperature Monitoring
