

Non-Contact Infrared Thermometer with Laser Sighting

This is an infrared thermometer designed for non-contact temperature measurement. It features a laser sighting for accurate targeting and a digital display for easy reading.

Product Overview

Professional Non-Contact Infrared Thermometer

This infrared thermometer provides accurate, non-contact temperature measurements for demanding industrial and professional environments. Equipped with precise laser sighting and a 12:1 distance-to-spot ratio, it allows for safe and efficient surface monitoring. The device features a clear digital display with backlighting, making it an essential tool for HVAC, automotive, and general industrial maintenance applications.

Measurement Performance

Temperature Range

-50 °C

Min Temperature

380 °C

Max Temperature

Accuracy

Temperature Range	Accuracy
T > 0°C	± 1.5°C
T < 0°C	± 3°C

Distance to Spot Ratio

12 :1

Laser Specifications

Laser Technical Specs

- Wavelength: 650nm
- Laser Class: 2
- Power: < 1mW

Operational Features

Key Features

White LED Backlight, Celsius/Fahrenheit Switchable, Low Battery Indicator, Automatic Power Off

Power Requirements

Battery Type

9V 6F22
