

Non-Ferrous Metal Components

These non-ferrous metal components are suitable for plumbing, machinery, and other industrial applications. The components include fittings, connectors, and levers in a range of shapes and sizes.

Product Overview

High-Quality Non-Ferrous Components

These non-ferrous metal components are engineered for durability and reliability in demanding industrial environments. Crafted from high-grade alloys such as brass and bronze, they offer excellent corrosion resistance and mechanical strength. This versatile collection is suitable for a wide range of applications, including plumbing systems, machinery assembly, and specialized hardware fabrication.

Technical Details

Common Applications

- Plumbing Fittings
- Mechanical Connectors
- Industrial Levers
- Specialized Hardware

Key Features

Corrosion Resistant • High Durability • Industrial Grade

Material Composition

Brass, Bronze, Non-Ferrous Alloy
