

Non-Ferrous Metal Grinding Abrasive Roll

Abrasive roll designed for grinding non-ferrous metals. It features a durable backing and a specialized abrasive grain for efficient material removal and a smooth finish.

Product Overview

Professional Abrasive Solution

This high-performance abrasive roll is specifically engineered for grinding and finishing non-ferrous metals. It features a durable backing combined with a specialized abrasive grain, ensuring efficient material removal and a consistent, smooth surface finish. Designed for versatility, this roll is an essential component for various demanding metalworking applications.

Technical Specifications

Primary Application

Non-Ferrous Metals • Grinding • Finishing

Available Grits

- 120

Model Series

JC122
