

Non-Floor Damaging Machinery Moving Rollers

These moving rollers are designed to prevent damage to floors during heavy machinery relocation. Their capacity can be customized to exceed 2000 tons, offering a durable and reliable solution.

Overview

Heavy-Duty Machinery Moving Solutions

These non-floor damaging machinery moving rollers are designed for the safe and efficient transport of heavy loads. Featuring a low-profile design that keeps cargo close to the ground, these skates allow for easy steering with minimal pushing or pulling effort. Built for durability and performance, they are suitable for a wide range of industrial applications.

Performance

Load Capacity

2000 tons

Maximum Load Capacity

Wheel Material Options

Nylon, Polyurethane, Steel

Manufacturing Experience

20 years

Usage Guidelines

Operational Best Practices

- Ensure proper load distribution across all roller units
- Verify correct positioning before movement
- Follow safety protocols to prevent floor damage
- Maintain low center of gravity during transport
