

Non-Magnetic Pipe Wrench

This pipe wrench is designed for gripping and turning pipes and fittings in environments where magnetic interference is a concern. The wrench is constructed from non-magnetic materials and offers a sturdy adjustable jaw and comfortable handle.

Product Overview

Professional Non-Magnetic Pipe Wrench

Engineered for high-stakes environments, this heavy-duty pipe wrench is constructed from specialized non-magnetic materials, ensuring safety where magnetic interference is a concern. It maintains structural integrity in extreme temperatures, ranging from -250°C to 600°C, without deformation. This tool offers a reliable, durable solution for professional applications requiring environmental safety and consistent performance.

Material & Performance

Temperature Range

600 °C

High Temp Limit

-250 °C

Low Temp Limit

Material Composition	Titanium Alloy, Stainless Steel
Magnetic Properties	Non-magnetic in strong magnetic fields

Certifications

Compliance Standards

CE • ISO • SGS • ROHS

Design Features

Key Features

- Heavy-duty construction
- Adjustable jaw mechanism
- Ergonomic handle design
- Non-polluting and radiation-free
