Product Overview

Industrial Safety Tool

This non-sparking pipe wrench is precision-engineered from a high-quality aluminum bronze alloy. Designed specifically for hazardous environments, it minimizes the risk of ignition near flammable or explosive materials. The tool features a robust die-forged construction, ensuring long-term durability and reliable performance in demanding industrial applications.

Technical Specifications

Material	Aluminum Bronze Alloy
Manufacturing Method	Die Forged

Key Features

Design Advantages

- Adjustable jaws for various pipe sizes
- Serrated teeth for secure gripping
- Sturdy handle for optimal torque application
- High durability for industrial use

Safety Attributes	Non-Sparking, Corrosion Resistant
