

# Non-Sparking Brass Oil Sample Collector

This non-sparking sample collector is designed for oil collection. It is made of brass to prevent sparking in hazardous environments.

## ADDITIONAL IMAGES

## Product Overview

### Professional Oil Sampling Solution

This non-sparking brass oil sample collector is engineered for safe and precise sample extraction in hazardous industrial environments. Constructed from solid brass, it effectively eliminates the risk of accidental sparking, making it an essential tool for the petroleum and chemical industries. The design incorporates a durable cylindrical body with specialized mechanisms for reliable performance during quality control and analysis tasks.

## Technical Specifications

Material	Solid Brass
Safety Features	Non-Sparking, Hazardous Area Safe

## Design & Handling

### Design Features

- Cylindrical body
- Tapered end
- Knurled cap for secure closure
- Plunger mechanism for precision
- Attachment points for handling

## Applications

### Recommended Industries

Petroleum • Chemical • Industrial Quality Control
