

Non-Sparking Firefighter Axe

This axe is designed for firefighting applications, made from non-sparking materials. It is constructed from aluminum bronze or beryllium copper using precision casting.

Product Overview

Professional Non-Sparking Firefighter Axe

This specialized firefighter axe is engineered for safety in hazardous atmospheres where flammable vapors are present. Featuring a non-sparking head design, it significantly reduces ignition risks during emergency operations. The tool is built for versatility, combining chopping and prying capabilities with a durable, textured handle for a secure grip.

Key Features

Safety Characteristics	Non-Sparking Head, Hazardous Atmosphere Safe, Anti-Ignition Design
Handle Features	Durable construction with textured grip for secure handling
