

Non-Sparking Pipe Wrench

This pipe wrench is designed for use in environments with flammable and explosive hazards. It is widely used in industries such as petrochemical and mining.

Product Overview

Safety-First Engineering

This non-sparking pipe wrench is engineered for high-risk environments where flammable vapors, liquids, or dust are present. Constructed from specialized non-ferrous alloys, it effectively eliminates the risk of sparks, ensuring safety in critical industrial applications. With a robust design and precise manufacturing, this tool provides reliable performance for professionals in the petroleum, chemical, and mining sectors.

Technical Specifications

Hardness Rating

25 HRC Al-Bronze Hardness	35 HRC Be-Bronze Hardness
-------------------------------------	-------------------------------------

Tensile Strength Comparison

Material	Tensile Strength
Aluminum-Bronze	75-85 kgf/mm
Beryllium-Bronze	105-120 kgf/mm

Available Sizes

- 6 inch (150mm)

Material Composition

Aluminum Copper, Beryllium Copper

Compliance & Usage

Certifications

ISO9001 • UKAS

Finish Options

- Natural
- Green

Primary Applications

Petroleum Industry, Chemical Industry, Power Generation, Railroad, Mining
