

# Non-Sparking Ratchet Box End Wrench

This ratchet wrench is designed for use in potentially explosive environments. The box end type construction ensures a secure grip on fasteners.

## Product Overview

### Safety-First Engineering

This non-sparking ratchet box end wrench is specifically engineered for high-risk operations in explosive and flammable atmospheres. Designed with a robust ratchet mechanism for efficient fastener management, it offers a secure grip that minimizes slippage. Ideal for sectors like petrochemical, mining, and oil & gas, this tool is an essential safety component for maintenance teams working in hazardous environments.

## Technical Specifications

### Tool Size

**32 mm**

Drive/Size

### Wrench Type

Ratchet Box End

### Key Features

Non-Sparking, Ratchet Mechanism, Explosion-Proof, Hazardous Duty

## Applications

### Recommended Industries

- Petrochemical
- Mining
- Gas Stations
- Railway
