

Non-Sparking Striking Open Wrench

This non-sparking striking open wrench is designed for use where flammable or explosive hazards exist. The open-end design allows easy engagement, and the striking face enables force application with a hammer.

Product Overview

Professional Non-Sparking Striking Open Wrench

This striking open wrench is engineered specifically for use in hazardous environments where flammable vapors, liquids, dust, or residues are present. Designed according to DIN 133 standards, it features a robust construction that allows for the application of high force using a hammer. It is an essential safety tool for critical industries such as petrochemical, mining, and aerospace, minimizing ignition risks during maintenance.

Technical Standards

Manufacturing Standard	DIN 133
Size	36 mm

Application & Usage

Safety Features

Non-Sparking • Hazardous Environment Safe • Striking Design

Suitable Industries	Petrochemicals, Oil & Gas, Mining, Chemical Industry, Aerospace, Pharmaceutical, Defense, Automobile, Fire-Fighting
