

Non-Stick Springform Cake Pan

This springform pan features removable sides, held by a clamp, for easy removal of baked goods. Constructed from non-stick coated metal, it is ideal for baking cakes and desserts.

Product Overview

Professional Springform Design

This high-quality springform cake pan is engineered for precision baking, featuring a removable side wall secured by a durable latch mechanism. The design ensures that delicate desserts, such as cheesecakes and tiered cakes, can be released cleanly without damaging their structure. Crafted from conductive metal with a professional non-stick coating, it promotes even heat distribution and effortless cleanup for busy commercial kitchens.
