

Noodle Extrusion Machine

This machine is designed for making corn and rice noodles. It features a stainless steel construction with adjustable settings.

Product Overview

High-Efficiency Noodle Extrusion Solution

This industrial-grade extrusion machine offers a comprehensive solution for producing high-quality corn and rice noodles. Featuring integrated automatic grinding, extruding, and curing functions, it streamlines the production process from raw grain to finished noodle. Built with durable SUS 304 stainless steel, it ensures hygiene and longevity for professional food processing environments.

Performance Metrics

Production Capacity

100 kg/h

Output Capacity

Motor Speed

1420 r/min

Technical Specifications

Power Consumption

3 kW

Motor Power

12 kW

Heating Power

Model

FDXY-A-100

Dimensions

1200 x 500 x 1600 mm

Weight

150 kg

Material & Compatibility

Material

SUS 304 Stainless Steel

Noodle Output Options

- Round Noodles
- Flat Noodles
- Custom Sizes

Compatible Raw Materials

Corn Grits, Rice, Potato Starch, Millet, Sorghum, Soybean, Green Bean
