

# North American AC Power Plug

This is a standard North American AC power plug. It is typically used to connect electronic devices to a mains power supply and is rated for 125V AC, 15A.

## Product Overview

### Standard North American AC Power Plug

This standard North American AC power plug is designed for secure and reliable connection of electronic devices to a mains power supply. Featuring a robust three-prong configuration with a grounding pin and polarized blades, it ensures safety and compatibility across typical domestic and commercial power systems. Its compact and functional design makes it an essential component for high-quality electronics integration.

## Technical Specifications

Rated Voltage	125 V
Rated Current	15 A
Configuration	3-prong, Grounded, Polarized
