

# Notebook PC Bottom Case Chassis

This bottom case chassis provides structural support and protection for notebook PC internal components. It is constructed from durable material and includes mounting points and cutouts for ventilation and connectivity.

## Product Overview

### Notebook PC Bottom Case Chassis

This bottom case chassis is engineered specifically for notebook PC series, providing essential structural support and protection for internal components. It features precision-engineered mounting points for the motherboard, battery, and various peripherals to ensure stable assembly. Constructed from durable materials, the chassis enhances overall device rigidity and longevity while incorporating optimized cutouts for ventilation and external connectivity.

## Design & Construction

Component Type	Bottom Case Chassis
Key Features	Structural Support, Ventilation Cutouts, Connectivity Openings, Durable Construction

## Compatibility

### Integrated Mounting Points

- Motherboard
- Battery
- Peripherals
